Optimized Payments
Analytics. Insights. Savings.

**Job Title:** **Software Developer**
**Location:** Dunwoody, GA [person must be in the Atlanta metro area]
**Job Type:** Full-time
**Work Authorization:** United States (required)

## Company Description

Optimized Payments is an Atlanta based analytics and consulting firm helping companies streamline their payment operations. We are a growing, 14-year-old company looking for talented individuals who want to grow with us. Our client portfolio includes Fortune 500 firms such as Apple, Staples, Safeway, Priceline, AutoNation and the U.S. Postal Service.

## Job Description

As a Software Developer, you will write, troubleshoot, and debug C#, SQL, Python and JavaScript applications. We utilize Azure to coordinate data flows into Snowflake data warehouse.

We are looking for an energetic professional who is passionate about making a difference and willing to learn and implement best practices. This person will report to the Chief Data Architect and will be dotted line to Director of Technology.

## Job Description

- Define requirements and individually scope projects given user scenarios and objectives. Self-organization and incremental design are key as the project changes.
- Implement custom application design including consideration of time boxing and constraints.
- Develop applications with a lean mindset. Focusing more on the why then the how.
- Demonstrate modern coding techniques that fit with accepted standards appropriate for the technology our organization is utilizing.
- Package and publish applications to deploy in real world scenarios.
- Commit early and often your pieces of code to the repository. Maintain healthy organized habits regarding the code that is committed to the repository.
- Update tasks in the project management and organization software. Keeping an active project up to date is critical.
- Foster an active feedback loop with sponsors and product managers.
- Maintain code that continues to meet the robustness required to comply with modern security standards and practices such as OWASP, PCI, etc.
- Continue to maintain and validate current the code base. Fixing bugs and improving applications as they are used in production environments.
- Strive for satisfaction from the perspective of the customer.
- Follow up with bug fixes and requests with appropriate sponsors after testing. Ensure the requirements are met, and no further defects exist.

## Skills & Qualifications:

- Independent, self-motivator, intelligent, entrepreneurial
- C#, python, sql experience
- Azure and Snowflake experience a plus
- Payments industry experience a plus
