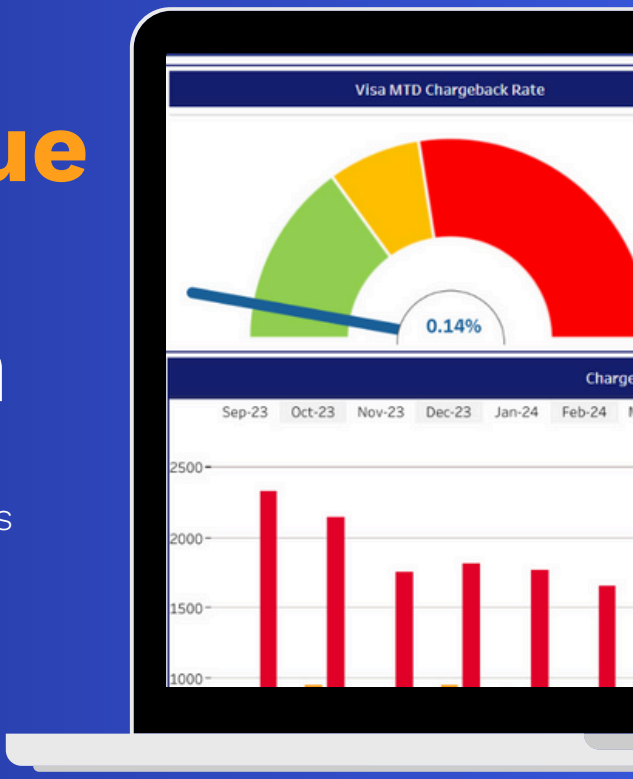
Protect your revenue and stop disputes before they happen

Every transaction carries the risk of a chargeback. Optimized Payments acts as a lifeline, offering insights into the causes of these disputes and strategies to prevent them from eroding your revenue.



Stop chargebacks from impacting your bottom line

Customers often see a chargeback as a simple refund, but it costs you, the merchant, much more. It's estimated that **for every $100 in chargebacks, you'll pay $240**, almost **250%** of the purchase amount if you're unable to accurately provide proof of the sale.

Optimized Payments can act as your payments partner to help you protect your bottom line by providing you tools and strategies to effectively manage chargebacks.

Empower your team to quickly settle payment disputes

With the right tools and insights, you can spend minutes, not days, reclaiming your revenue.

Simplify your operational workload

Streamline your operations to reduce the time and resources needed for dispute resolution.

Use analytics for proactive dispute management

Visualize and analyze your chargeback data to get ahead of disputes before they happen.
