

Aggregate, Simplify, & Optimize Your Payments Data

Save money in card processing fees, improve authorization rates, and streamline your back-office operations with our payment analytics platform.

Access data from all your payment vendors in **ONE** comprehensive platform. Months of IT integration, testing, and building a data warehouse, are gone – leaving you time to focus on actionable insights that improve your bottom line.

DASHBOARDS

Access transaction-level analysis when you need it.

REPORTING

Routinely track the performance indicators that keep you ahead.

BENCHMARKING

Leverage our proprietary database to uncover key metrics.

NOTIFICATIONS

Customize email notifications to prioritize what matters to you most.

Key Benefits of Harmonize

Identify Trends & Forecasts

Leverage historical data to perform trending analysis and forecasting for sales, transactions, and fees by MID, division, business unit, or the entire organization.

Analyze BINs

Uncover card metadata to explore root-cause of declines, fraud, evaluate alternative payment methods, identify least cost routing strategies, and negotiate with the credit and debit networks.

Improve Daily Reconciliation

Easily validate sales from your POS with settlement reporting, including daily emails and online dashboard alerts that give you the opportunity to verify sales, transactions, and fees by card brand, as well as deposit amounts.

Audit & Benchmark Acquirer Fees

Confirm whether the network fees you're being charged align with published rates—and that you're not being overbilled by your processor. Benchmark acquiring fees against similar-sized merchants and get guidance that can be used in your next negotiation.

Stay Informed

Set daily, weekly, or monthly alerts for key metrics that affect your bottom line. For example, get an alert if your downgrades exceed 2% of total sales or the number of chargebacks goes over 20 in a single day or approval rates drop to 50%.
